

SERGEY GORKOV HELD A WORKING MEETING WITH ASKAR MAMIN, PRIME MINISTER OF KAZAKHSTAN

08.10.2020

The meeting participants discussed the issues of further cooperation development between RosGeo and the Republic of Kazakhstan, in particular, prospects of application of unmanned appliances for conducting aerogeophysical acquisition on the territory of Kazakhstan, prospects of water surveys, as well as seismic exploration on the licensed sections of the Northern and Middle Caspian Sea, study of deep-sea sub-salt structures of the Kazakhstan sector of the Caspian basin using advanced technologies of reprocessing and reinterpretation of available geological and geophysical data.

In addition, the parties discussed the prospects of establishment of the Eurasian exchange for junior geological exploration companies in the purposes of restoration of the mineral and resource base, as well as socio-economic and infrastructural development of the regions through performance of the geological exploration.

Reference:

RosGeo is a Russian multi-disciplinary geological holding that carries out a full range of services related to geological exploration: from regional surveys to parametric drilling and monitoring of subsoil conditions. The holding company boasts a unique expertise, particularly in marine geology and shelf operations. A total of more than 1000 fields and deposits have been discovered by the holding's companies, including major hydrocarbon and solid mineral deposits and fields. RosGeo is a fully state-owned company.
